Ces horaires sont calculés à l'avance, en tenant compte des heures de marées, des coefficients, des saisons, de la fréquentation habituelle des oiseaux... Cependant, ces paramètres ne nous permettent pas de garantir la présence des oiseaux à l'heure dite, bien d'autres variables étant à prendre en compte (météo, dérangements...). Prévoir 3-4h de visite au minimum.

*These timetables are established in advance, taking into tides, tidal ranges, seasons, usual attendance of birds. However, these parameters do not allow us to guarantee the presence of birds at the appointed time, many others variables have to be considered (weather, disturbance...). You need 3 to 4 hours to "do" the reserve.*

Ces horaires sont calculés à l'avance, en tenant compte des heures de marées, des coefficients, des saisons, de la fréquentation habituelle des oiseaux... Cependant, ces paramètres ne nous permettent pas de garantir la présence des oiseaux à l'heure dite, bien d'autres variables étant à prendre en compte (météo, dérangements...). Prévoir 3-4h de visite au minimum.

*These timetables are established in advance, taking into tides, tidal ranges, seasons, usual attendance of birds. However, these parameters do not allow us to guarantee the presence of birds at the appointed time, many others variables have to be considered (weather, disturbance...).
